

TRUCKEE MEADOWS PARKS FOUNDATION

AWARENESS • APPRECIATION • STEWARDSHIP

In the video, our rainbow trout had many adaptations to help her survive. Can you match the adaptation to its purpose below? Then see if you can find something around your house that can act as each adaptation! For example, our trout used a snorkel tube to represent the gills that help her breathe.

Swim bladder

Sense what is around you

Lateral line

Camouflage and protection from injury

Dorsal fins

Smell and navigate through water

Eyes

Breathe oxygen underwater

Scales

See what is around you

Nostril/nares

Stay balanced

Pectoral fins

Stay afloat at the proper depth

Gills

Steer through the water

Leave us a comment on Facebook with a picture of you all dressed up as a rainbow trout!
